

1. Network Security

- In light of the worldwide outbreak of the wannacry virus, additional internal steps have been taken to help prevent ransomware virus attacks.
- The agency has an added layer of security protection from zero-day ransomware attacks that will be implemented this month.

2. Security Cameras

- The Administration Office security camera system will be operational by Friday, June 9th.

3. I-Affordable Software Implementation

- The Authority is transitioning manual file tracking from spreadsheets to YARDI software in order to have all files consistent
