1. **Yardi Voyager 7S Upgrade**

   - The database has been sent to Yardi for testing in the 1st hosted environment, the next step is to transition over to the hosted environment in the current version and implement mobile work orders.

2. **Project Management Solution**

   - The Agency has moved forward with a Project Management software solution for Development & Maintenance Projects.
   - Templates are being created to allow for custom reporting.

3. **Online Job Applications**

   - An Online Job Application Submission Form has been created to alleviate the paper application process (this is the first step toward online applications moving forward).
