

The 1612 Shop – IT staff will complete the network infrastructure installation for the Shop at 1612 Sisk Rd. in the month of March. The shop required a Fiber installation to allow for full internet connectivity to the main office. In addition, new wireless infrastructure, security cameras, and a ring door system will be installed. The final component of the Shop upgrades will include a cloud-based shop door opener that integrates with the existing remotes and systems that the Housing Authority is implementing at other properties.

Yardi Projects Update – The Housing Authority continues to work with Yardi software staff to improve processes within the software and efficiencies for Housing Authority Staff. Currently the Agency is working to streamline property portfolio information transfer. The information transfer is expected to be completed in May 2024. Once complete, the Housing Authority can move forward with additional Rent Café offerings.

1612 Digital Signage – IT Staff have been working to configure digital signage for The 1612 building. This includes directory information, Housing Authority information, ballroom suite names, the ability to add scheduled meetings with daily agendas, and resident services office information.

Laundry Room Secure Access – Update – The equipment for the laundry room upgrades will arrive in the month of March and be schedule to be installed and fully operational before April 1, 2024.

Security Camera Installations – Update - The Housing Authority is continuing to improve camera system security coverage. The 1612 and Walker Pointe will be receiving upgraded Cameras in the month of March. This includes the use of AI to capture license plates and human activity with the ability to filter out much unwanted activity that normal systems would capture.
